RE: Black Bear Disposal, LLC,
a subsidiary of Waste Industries, USA, Inc.
Site Study Revisions of April 21, 2005
Camden County, North Carolina

Dear Mr. Grant,

The April 21, 2005, revisions to the Revised Site Study for the proposed Black Bear Disposal facility in Camden County have been reviewed for hydrogeologic concerns by the Solid Waste Section. There are still a few items in the Report that need clarification and/or revision. Please respond to the following questions and comments:

Section 8 - Preliminary Geotechnical Evaluation:

- 8.3 In the second paragraph, there are still two references to ditches that run along the landfill ... "footprint". The last three words of the next to last sentence ("boundary property footprint") should be deleted. And the last word in the last sentence should be changed from "footprint" to facility.
- 8.5.2 The first paragraph references a "layer of fill" below the tilled topsoil. Is this really fill? It is not clear how a 0 to 8 foot layer of fill material would be deposited below the topsoil in this environment.
- There still appears to be a problem with the pagination. The text goes from page 8-4 (to Table 8-1) to page 8-7. There does not appear to be a page 8-6.

Revised Site study Report
Page 2

8.6.3 In the second paragraph on page 8-14, The settlement number for the 10 year interval does not appear to match the number in Table 8-5.

Please respond to these questions and comments, and provide revisions as necessary. If you have any questions regarding items in this letter, please contact me at (919) 508-8507.

Sincerely,

Bobby Lutfy
